We need universal voter registration and simple, easy, mail in AND electronic voting opportunities. We need to STOP gerrymandering districts immediately.

I'm concerned about any legislation that suppresses voters. I support efforts to maintain early voting .that includes operating in the evenings on or weekends. I support having polling sites located in our lower economic areas, as transportation to polling sites can be an issue - these residents deserve to be able to exercise their right to vote. If reducing costs is an objective, then I support extending opportunities for Mail-in Ballots to all ages and having access to Ballot Box drop sites. As a tech-savvy senior citizen, I found it difficult this past year to apply online and to acquire a mail-in ballot -- which I never did receive. It seems to me that some tactics being used are the cry of "voter fraud" as a guise to suppress voting opportunities. Yet, research and Texas county clerks have shown facts, that all across Texas, there has been a minuscule amount of voter fraud. I fear Texas is reverting backwards to "Jim Crow" ways; I'd rather see Texas be a beacon of progress.

It is vital for our democracy that the greatest number of eligible voters be allowed and encouraged to cast a ballot in the least restrictive way. Only then will we have a truly representative government. It is not important which political party is favored or disadvantaged. If the party platforms and candidates keep the public good in mind, the will of the people will prevail.

Houston, TX

As a voting citizen of Texas, I strongly urge you to increase the ease in regard to how voting is done. This can be done in a number of ways. There should be an increase in online voter registration opportunities. There also needs to be a no excuse mail in ballot option. There also needs to be a robust tracking system so that a voter is assured that their mail in ballot was received and counted. The pandemic has proven why this is needed. There should be many secure drop boxes, and many more than 1 per county. Having only 1 in Harris County does not help Texans participate in a democratic Republic. New and inventive ways to vote, like drive through voting, must be allowed and increased. Volunteer voter registrars must continue to be allowed to assist with registering new and former voters. Early voting must be kept and increased in length. Proposals that in any way target black and brown communities, whether intentional or not, must not be approved. Polling locations must not be reduced in minority

communities. Being able to vote at any polling location in your county can help reduce lines.

Our system of government is a representative democracy. This mandates that voters elect officials. Voters must be given every opportunity to vote. Anything less is unpatriotic and inconsistent with the values that this country and state hold dear. Any proposed laws that restrict access to voting go against what this country stands for.

Self - Retired

Round Top, TX

I have been a poll worker for many years and have always been impressed with how professionally and ethically it is run. I have never seen any attempts at cheating. I have also voted by mail and cannot imagine how that could be compromised. The elderly really need to be able to vote by mail, so please don't take that away!

Also the idea of a felony for workers is really heavy handed. People are actually going to become afraid to vote!
